

Osewan Borehole Project (New Project):

“Our work doesn’t stop and can’t stop now.

Osewan people need us now, more than ever...finally it’s their turn!
People have been trying to live in Osewan for a long time but cannot.
The area is very dry. It has ample pasture, but no water for cows or people.

We want to make sure people in that area have enough clean water for themselves, for their families; enough water so they can build a school and build a hospital.”

- Joyce Tannian, Founder & Director
